Diepsloot Pedestrian Bridge Project 2017/18

Mobility made easy

Dear residents

We are committed to ensuring the safety of our communities. We have therefore invested R16.4 million to construct a pedestrian bridge in the Diepsloot community to keep residents safe when crossing the Jukskei River during flooding.

This bridge will link Diepsloot Ext. 1 and Ext. 2 together. The project is estimated to be completed in July 2017.

We are faithful to the development of the poor through the provision of and access to services. In our efforts to improve Johannesburg's road network and stormwater infrastructure, public safety is paramount and will be prioritised.

– Herman Mashaba

Flash Flood Safety Information

Flash floods can occur within a few minutes when there is very heavy rainfall. This may be caused by a blocked stormwater drain, a dam failure or heavy rain.

Read through the list of flood safety rules in this brochure. Adhere to them during a flood warning in order to save your life and that of others.

Pedestrian Safety

- If you are outdoors and flash flood is likely to occur, get to higher ground immediately! You cannot outrun a flash flood.
- Keep out of places that are likely to flood such as ditches or dry stream beds.
- Avoid already flooded areas and areas with a fast flow of water.
- Never attempt to run across flooding water when the water is above your ankles.
- Do not walk into or near high water.
- Keep children from drainage ditches and open stormwater drains.
